

Sony-Ericsson T610 Bluetooth Connections

You can use the Microsoft® Wireless Transceiver for Bluetooth® to transfer files, contacts, and other information between your Sony-Ericsson T610 mobile phone and your computer. For this to work correctly, you must first configure the computer and mobile phone to communicate with each other.

This document will help you configure your computer and your mobile phone to communicate over a Bluetooth connection, and step you through synchronizing your data.

These instructions assume that:

- You have already set up and configured your Microsoft Wireless Transceiver for Bluetooth on your computer.
- You have the Sony-Ericsson Communication Suite CD-ROM, or you have downloaded the latest version of Communication Suite 1.5.9 from the Support area at <http://www.sonyericsson.com>.
- You are running Microsoft Windows® XP with Service Pack 2 installed.

To configure your phone for Bluetooth connections

- 1 Press **Menu**, press **Connect**, press **Bluetooth**, and then press **Options**.
- 2 Select **Visibility**, and then choose **Show Phone**.
- 3 (Optional:) Select **Edit Phone Name**, and then enter a custom name for the mobile phone.
- 4 Press **Back** to return to Bluetooth, and then select **Turn On**.

To add your mobile phone to Windows as a Bluetooth device

- 1 On your computer, click **Start**, click **Control Panel**, click **Printers and other Hardware**, and then click **Bluetooth Devices**.
- 2 On the **Devices** tab, click **Add**.
- 3 Follow the instructions in the Add Bluetooth Device Wizard to install your mobile phone. When prompted, you will need to enter a passkey on your mobile phone to accept the connection from your computer.
- 4 On the **Finish** screen of the wizard, make a note of the incoming COM port assigned to your phone's Bluetooth connection. You will use this information to configure your phone synchronization software in the following procedure.

To install the Communications Suite and XTNDConnect PC

The Sony-Ericsson Communications Suite is a collection of programs that your mobile phone uses to interact with your computer in various ways. XTNDConnect PC is used specifically to synchronize your e-mail client, such as Microsoft Outlook®, with the corresponding applications on your mobile phone.

- 1 On your computer, start the Communication Suite installation from the CD-ROM or by double-clicking the .exe file downloaded from the Web.
- 2 Follow the setup instructions to install the Communication Suite and XTNDConnect PC on your computer. Restart your system when prompted.
- 3 After Windows has restarted, click **Start**, click **Control Panel**, and then click **Phone Monitor Options**.
- 4 Click the **COM Ports** tab.
- 5 Select the COM port that you wrote down earlier, and then select **Enable**.
- 6 Click **OK** to save your changes.

To synchronize your e-mail content, click **Start**, point to **All Programs**, point to **Sony Ericsson**, and then click **Start Outlook Synchronization**.

Troubleshooting Tips

Problems synchronizing your Outlook information

When using XTNDConnect PC with your T610 mobile phone, there can be issues with synchronizing data over a Bluetooth connection. If this happens, try the following steps:

- If you receive a Device not found error message, click **Retry** to search again. You may need to try more than once to complete the connection..
- When a Bluetooth connection is established, the Phone Connection Wizard may appear. Click **Next** on each screen of the wizard to return to the synchronization process. If the wizard launches more than once, click **Cancel** to skip the wizard.
- Restart your computer and try the synchronization process again.
